OUTLOOK & VALUATION

ICICI Bank continues to demonstrate steady operational execution with high asset quality and comfortable capital buffers. Strong traction in business banking and retail loans, paired with declining provisions (-25.9% y-o-y in Q2-2026), supports a healthy RoE of 16.0% (standalone). Overall valuation outlook remains positive given strong market positioning, well-contained credit costs, and strong digital onboarding ecosystem.

KEY RISKS

- Potential pressure on Net Interest Margin (NIM) due to elevated deposit costs and competitive pricing in retail loans.
- Macroeconomic slowdown or systemic stress impacting asset quality in retail and micro/SME segments.
- Regulatory policy shifts regarding liquidity standards or statutory reserve requirements.
