COMPANY OVERVIEW

JSW Energy Limited is one of India's leading power sector companies and part of the O. P. Jindal Group. The company has a diversified power generation portfolio across thermal, hydro, solar, and wind energy segments, with an installed operational capacity of 13.2 GW as of Q2 FY26.

JSW Energy is aggressively expanding its renewable energy footprint as part of its Strategy 3.0, aiming to reach 30 GW of generation capacity and 40 GWh of energy storage capacity by 2030. The company actively operates long-term contracted assets as well as short-term open generation, alongside expanding into advanced energy solutions such as Battery Energy Storage Systems (BESS) and Pumped Hydro Energy Storage (PHES).

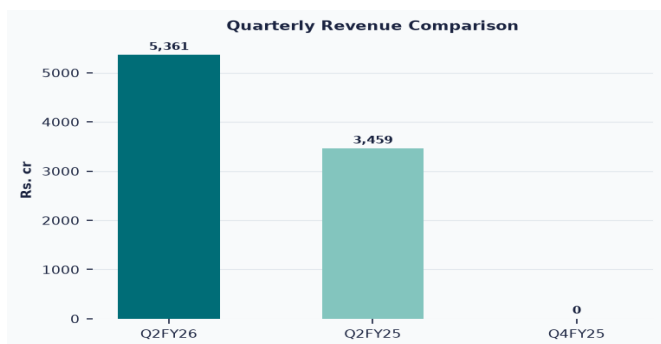

KEY HIGHLIGHTS

- Robust generation growth: Total net generation surged 52% YoY to 14.9 BUs in Q2 FY26, driven by a 42% YoY growth in renewable energy generation and a 62% YoY increase in thermal generation.
- Strong revenue and operational profitability: Consolidated total revenue rose 55% YoY to ₹ 5,361 Cr, while reported EBITDA jumped 67% YoY to ₹ 3,180 Cr with expanded EBITDA margins of 59%.
- Expansion trajectory on track: Installed operational capacity reached 13.2 GW with 443 MW added in Q2 FY26. Total locked-in capacity stands at 30.5 GW across operational, under-construction, and pipeline projects.
- Strategic acquisitions and vertical integration: Key developments include acquiring KSK Water Infrastructure for Mahanadi's water security, entering a scheme of arrangement with GE Power India for boiler manufacturing, and acquiring the 150 MW Tidong HEP from Statkraft.
- Healthy balance sheet and cash flows: Cash PAT grew 27% YoY to ₹ 1,512 Cr in Q2 FY26. Receivables DSO improved to 64 days, backed by credit ratings affirmed at AA/Stable/A1+.

OUTLOOK & VALUATION

JSW Energy continues to exhibit strong operational performance driven by aggressive renewable capacity additions and strategic consolidation of thermal assets like Mahanadi and Utkal Unit-II. The company's expansion into long-term contracted storage capacities (BESS and Pumped Hydro) provides long-term cash flow visibility.

While reported PAT was impacted by higher finance costs and depreciation associated with commissioning new capacity, Cash PAT expanded strongly by 27% YoY to ₹ 1,512 Cr. Leverage remains monitored with Net Debt/Equity at 2.1x and Net Debt to Proforma EBITDA at 4.8x. The long-term valuation outlook remains anchored by its visibility toward achieving 30 GW power generation and 40 GWh storage capacity by 2030.

KEY RISKS

- High leverage and debt service burden associated with ongoing massive capital expenditures (Net Debt stands at ₹ 61,960 Cr).
- Execution and delay risks across the 12.5 GW under-construction pipeline and under-acquisition hydro assets.
- Off-taker default or delayed payment risks, alongside fuel cost and power tariff fluctuations in open/short-term capacity sales.
